OUTLINE

Problem: Cluttered sheets that are difficult to interpret

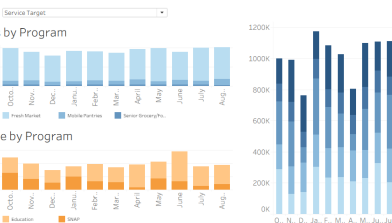

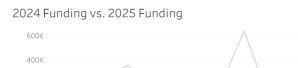

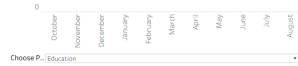

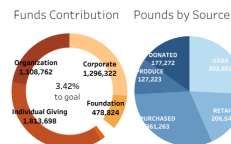

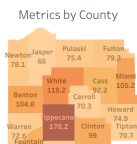

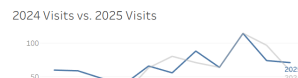

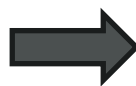

Beginning:

Difficult to interpret

Solution:

Interactive dashboards that organize the data

VOTER BY PRODUCTION														CUMULATIVE									
Program	October	November	December	January	February	March	April	May	June	July	August	September	FY20 Totals	October	November	December	Q1 FY20 Totals

LEARNING CURVE

Messed up labeling

- Without proper data structure, tableau can't input data properly
- Hard to create visualization if you don't understand which data is which label

Solution: Splitting up data base

- Separating data to be in different sheets
- Tableau can compute specific data for visual
- Easier to find data when researching

Scattered tables

▲ 110.6% vs. PY

Past Data Issues

- Data was sent in a PDF, caused hardcoding/parsing issues
- Column mismatch

Solution

- Use Tableau data source linking capabilities
- Deleted duplicates, renamed mismatched columns
